

Nkuna Mpho Brian

Junior Software Engineer & IT Automation / Support Technician

Mokopane, Limpopo, South Africa | nkunamphobrian060@gmail.com | 065 878 1969

PROFILE

Software engineering student and self-taught developer with hands-on experience across web systems, C#, Java, SQL and WordPress. Currently completing a BCom in Computer Science and Information Systems at Nelson Mandela University. Combines academic study with practical project work and tutoring experience, with a strong focus on automation, clean code and full-cycle software development.

EDUCATION

BCom Computer Science and Information Systems

Nelson Mandela University | 2023 – Present (in progress)

National Senior Certificate (Matric)

Somavugha Secondary School | Completed 2022

EXPERIENCE

Web Systems Developer

Self-directed / Freelance | 2 years

- Designed, built and maintained full web systems covering front-end and back-end development.
- Applied the software development lifecycle from planning through to deployment.

C# Developer

Self-directed / Freelance | 2 years

- Built applications using C# and ASP.NET MVC, applying object-oriented design principles.

WordPress Web Designer

Freelance | 1 year

- Designed and deployed custom WordPress websites for small businesses and individual clients.

Java Developer

Self-directed | 1 year

- Developed object-oriented Java applications to strengthen core programming fundamentals.

SQL & Database Management

Self-directed / Project work | 1 year

- Designed relational database schemas and wrote SQL queries to support application data layers.

Technical Mathematics Tutor (Grade 10)

1 year

- Tutored Grade 10 learners in Technical Mathematics, breaking down complex concepts into clear, practical explanations.
